### MARATHON COUNTY INFRASTRUCTURE COMMITTEE MEETING MINUTES

### Thursday, October 3, 2019, at 9 a.m.

### Central Wisconsin Airport, Conference Room B (Second Floor), 100 CWA Drive, Mosinee, WI 54455

Attendance:	Present	Excused	Absent
John Robinson, Chair	х		
Richard Gumz, Vice-Chair	Х		
Tom Seubert	Х		
Alan Christensen	х		
Sandi Cihlar	х		
Jeff Johnson	х		
Allen Opall			Х

Also Present: James Griesbach, Kevin Lang, Kendra Pergolski, Lance Leonard, Brian Grefe, Gerry Klein, Melinda Osterberg

#### 1. Call Meeting to Order

The meeting was called to order by Chairman John Robinson at 9 a.m.

### 2. Public Comment

No public comment was offered.

#### 3. <u>Approval of the Minutes of the August 22, 2019, and September 17, 2019, Infrastructure</u> <u>Committee Meetings</u>

MOTION BY CHRISTENSEN, SECOND BY SEUBERT, TO APPROVE THE MINUTES OF THE AUGUST 22, 2019, AND SEPTEMBER 17, 2019, INFRASTRUCTURE COMMITTEE MEETINGS. MOTION CARRIED.

### 4. Policy Issues Discussion and Potential Committee Determination: None

- 5. Operational Functions required by Statute, Ordinance, or Resolution:
  - A. Discussion and Possible Action by Committee
    - 1. Approval of design relative to County Highway K

**Discussion:** Highway Commissioner Griesbach explains the design options for County Highway K and County Highway WW to the committee.

Action: MOTION BY GUMZ, SECOND BY CIHLAR, FOR COUNTY HIGHWAY K AND COUNTY HIGHWAY A TO HAVE NO RAISED MEDIAN, INCREASED LIGHTING AND INCREASED SIGNAGE; THE RIGHT TURN LANE FROM COUNTY HIGHWAY A TO COUNTY HIGHWAY K WOULD INCLUDE A SLOW LANE FOR VEHICLES TO USE TO GET UP TO SPEED. COUNTY HIGHWAY K & COUNTY HIGHWAY WW WOULD INCLUDE A ROUND-ABOUT. MOTION CARRIED.

Follow through: The issue of funding to be discussed at May 2020 meeting.

### 6. Educational Presentations and Committee Discussion

A. Broadband Study Update

**Discussion:** Melinda Osterberg provided an update on the Design Nine draft. Osterberg indicated that the draft was vague and missing critical concepts that require clarification. A revised draft is expected to be provided in November, possibly December.

Follow through: n/a

B. Chair's report relative to Infrastructure issues discussed at the Wisconsin Counties' Association Annual Meeting

**Discussion:** Chair Robinson expounds on discussions held at the meeting relating to asset management, broadband expansion, ground water, levy limits, grants and funding sources. He provided the committee with relevant propaganda received at the meeting. **Follow through:** n/a

C. Highway Commissioner's Report – recent projects and planning, updates on transportation improvement funding and Wisconsin DOT webinar training opportunities

Discussion: Commissioner Griesbach expounds on his report.

### Follow through: n/a

- D. Cyber Security Current Practices and Next Steps (continued from last meeting): n/a
- E. Central Wisconsin Airport Overview Grefe
  - 1. Overview of CWA what are our current significant capital projects and what are the anticipated areas of future focus?

**Discussion:** Brian Grefe addressed the committee advising on CWA's long and short term goals which include: runway intersection, passenger terminal concourse, general aviation facilities, snow removal equipment and maintenance storage facilities. Grefe took the committee on a tour of the airport focusing on the implementation of each goal throughout. **Follow through:** n/a

### 7. Announcements:

A. Future meetings and location, agenda topics

8. <u>Adjourn</u> MOTION TO ADJOURN BY CHRISTENSEN, SECOND BY SEUBERT. MOTION CARRIED. MEETING ADJOURNED AT 11:45 AM.

Minutes prepared By Kendra Pergolski on October 23, 2019.

#### MARATHON COUNTY ORDINANCE Sec. 7.125 ALL-TERRAIN VEHICLES AND UTILITY TERRAIN VEHICLES

- (1) *Intent.* To create uniform procedures and requirements for the use and operation of All-Terrain Vehicles and Utility Terrain Vehicles on Marathon County routes and trails.
- (2) Definitions. In this section, words and phrases used herein shall have the meaning as defined by Wis. Stat. § 23.33(1), unless otherwise defined herein. All-terrain vehicles (hereinafter referred to as ATVs) shall have the definition given in Wis. Stat. § 340.01(2g). Utility terrain vehicles (hereinafter referred to as UTVs) shall have the definition given in Wis. Stat. § 23.33(1)(ng). Any reference to a Wisconsin Statute Section or Administrative Code Regulation is a reference to that specific chapter, section, code, or its successor chapter, section, or code. Any future amendments, revisions, or modifications of the statutes or administrative code incorporated herein are intended to be made part of this Code in order to secure uniform statewide regulation of all-terrain vehicles.
- (3) *Statutory Authority*. Marathon County is authorized to designate highways as ATV/UTV routes pursuant to Wis. Stat. §§ 23.33(8)(b) and 59.02, and is authorized to enact ordinances regulating ATVs and UTVs on designated routes and trails pursuant to Wis. Stat. § 23.33(11)(a).
- (4) Designating ATV/UTV Routes. The Marathon County Highway Commissioner (Commissioner) may designate ATV/UTV routes following due consideration of the recreational value and after weighing possible dangers, public health, liability concerns, terrain involved, traffic density, and history of automobile traffic on potential and existing routes.
  - (a) Duties of Highway Commissioner.
    - (i) The Commissioner shall designate which portions of county highways are ATV/UTV routes. The Commissioner will update the Infrastructure Committee with respect to the status of, and changes to, ATV/UTV routes.
    - (ii) The Commissioner shall ensure that all routes designated pursuant to this Ordinance are properly posted.
    - (iii)The Commissioner shall establish the official ATV/UTV route opening and closing dates for each year. Dates shall be posted on the Marathon County website in a place visible to the public.
    - (iv)All routes established pursuant to this Ordinance shall be reviewed annually by the Commissioner to consider the continued value, efficacy, and need for the ATV/UTV routes.

**Comment [MP1]:** Added to clarify that any statute referenced includes any successor statute or code.

- (b) Application Process for Route Designation. The Commissioner shall develop policies and procedures for consideration of, and designation of, ATV/UTV routes in accordance with the requirements of Wis. Stat. § 23.33, Wis. Admin. Code NR § 64, and the provisions of this Ordinance.
  - (i) Municipalities. Any town, village, or city in Marathon County may apply to the Commissioner and request that portions of county highways be designated as ATV/UTV routes. Applications shall be completed on a form prescribed by the Commissioner and must be in compliance with the policies and procedures developed by the Commissioner for the designation of ATV/UTV routes. The town, village, or city must further affirm that the municipality will pay for the costs to make, install, and maintain ATV/UTV route signs.
  - (ii) ATV/UTV Clubs. An organization that has assembled as a recognized ATV/UTV club may apply to the Commissioner and request that the Commissioner designate an ATV/UTV route within Marathon County. Applications shall be completed on a form prescribed by the Commissioner and must be in compliance with the policies and procedures developed by the Commissioner for the designation of ATV/UTV routes. An ATV/UTV club must further affirm that the club will pay for the costs to make, install, and maintain ATV/UTV route signs.
  - (iii)The County Board of Supervisors may rescind or modify the designation of an ATV/UTV route by enactment of an ordinance rescinding or modifying the designation.
  - (iv)*Application requirements.* An application for designation of an ATV/UTV route, at a minimum, include the following:
    - 1. A map showing the proposed ATV/UTV route on the county highway system.
    - 2. A map showing any ATV/UTV trails leading to the proposed route.
    - 3. A statement explaining why the proposed route should be designated as an ATV/UTV route.
    - 4. If the applicant is an ATV/UTV club, the names and addresses of its officers, the date when the organization was established or incorporated, and the number of members.
    - 5. A statement that the applicant will be financially responsible for payments for the installation and maintenance of required ATV/UTV route signs.

- 6. Any municipality in which the segment of a county roadway being proposed as an ATV/UTV route exists must have adopted the regulations in (6) of this provision for the application to be considered.
- (v) Appeal. The Commissioner's determination regarding an application for or continuation of a designated ATV/UTV route may be appealed by the person aggrieved as provided in Chapter 24 of the Marathon County Code of Ordinances. In the event of an appeal, the review of the Commissioner's initial determination shall be conducted by the county administrator or his or her designee.
- (5) *Designating ATV/UTV Trails*. The Wausau and Marathon County Parks, Recreation, and Forestry Director (Director) may designate ATV/UTV trails following due consideration of the recreational value and after weighing possible dangers, public health, liability concerns, and terrain involved.
  - (a) *Duties of Director.* 
    - (i) The Director shall designate which portions of county land are designated as ATV/UTV trails. The Director will update the Infrastructure Committee with respect to the status of, and changes to, ATV/UTV trails.
    - (ii) The Director shall ensure that all trails designated pursuant to this Ordinance are properly posted.
    - (iii)The Director shall establish the official ATV/UTV trail opening and closing dates for each year. Dates shall be posted on the Marathon County website in a place visible to the public.
    - (iv)All trails established pursuant to this Ordinance shall be reviewed annually by the Director to consider the continued value, efficacy, and need for the ATV/UTV trails.
  - (b) *Application Process for Trail Designation*. The Director shall develop policies and procedures for consideration of, and designation of, ATV/UTV trails in accordance with the requirements of Wis. Stat. § 23.33, Wis. Admin. Code NR § 64, and the provisions of this Ordinance.
    - (i) Municipalities. Any town, village, or city in Marathon County may apply to the Director and request that portions of county lands be designated as ATV/UTV trails. Applications shall be completed on a form prescribed by the Director and must be in compliance with the policies and procedures developed by the Director for the designation of ATV/UTV trails. The town, village, or city must further affirm that the municipality will pay for the costs to make, install, and maintain ATV/UTV trail signs.

Comment [MP2]: I "adopted" Lance's language here.

**Comment [MP3]:** As we discussed, I split routes and trails and created a separate process for trail designation.

**Comment [MP4]:** I was assuming we would designate Jamie as the designator but we could also designate Mitchell.

- (ii) ATV/UTV Clubs. An organization that has assembled as a recognized ATV/UTV club may apply to the Director and request that the Director designate an ATV/UTV trail within Marathon County. Applications shall be completed on a form prescribed by the Director and must be in compliance with the policies and procedures developed by the Director for the designation of ATV/UTV trails. An ATV/UTV club must further affirm that the club will pay for the costs to make, install, and maintain ATV/UTV trail signs. The Director may require an ATV/UTV club to execute a trail maintenance contract and obtain or maintain insurance as required by Marathon County.
- (iii)The County Board of Supervisors may rescind or modify the designation of an ATV/UTV trail by enactment of an ordinance rescinding or modifying the designation.
- (iv)*Application requirements.* An application for designation of an ATV/UTV trail must, at a minimum, include the following:
  - 1. A map showing the proposed ATV/UTV trail in relation to the county highway system.
  - 2. A map showing any ATV/UTV routes leading to the proposed trail.
  - 3. A statement explaining why the proposed trail should be designated as an ATV/UTV trail.
  - 4. If the applicant is an ATV/UTV club, the names and addresses of its officers, the date when the organization was established or incorporated, and the number of members.
  - 5. A statement that the applicant will be financially responsible for payments for the installation and maintenance of required ATV/UTV trail signs.
  - 6. If the proposed trail travels on private property, a statement from the owner of said property attesting that the landowner will consent to the creation of a trial on said property.
- (b) Appeal. The Director's determination regarding an application for or continuation of a designated ATV/UTV trail may be appealed by the person aggrieved as provided in Chapter 24 of the Marathon County Code of Ordinances. In the event of an appeal, the review of the Director's initial determination shall be conducted by the county administrator or his or her designee.

**Comment [MP5]**: Added this piece to allow us to require insurance but did not specify the amount in the ordinance in case it changes in future years.

- (6) *Regulation of ATVs and UTVs.* Except as otherwise provided herein, the statutory provisions of Wis. Stat. § 23.33 and Wis. Admin. Code NR § 64, which create, describe, and define regulations with respect to ATVs and UTVs, are adopted and, by reference, made a part of this Code as if fully set forth herein.
  - (a) Operator and Rider Requirements. Any person who operates or rides as a passenger on an ATV or UTV on a roadway that is an ATV/UTV route in Marathon County designated pursuant to Wis. Stat. § 23.33(8)(b)1, or an ATV/UTV trail in Marathon County designated pursuant to Wis. Stat. § 23.33(8)(c), must meet the following requirements:
    - (i) Any operator or passenger shall comply with all federal, state, and local laws, orders, regulations, restrictions, and rules, including those outlined in Wis. Stat. § 23.33 and Wis. Admin. Code NR § 64. All ATV/UTV rules of operation outlined in Wis. Stat. § 23.33 and Wis. Admin. Code NR § 64 are adopted and incorporated in this Ordinance.
    - (ii) No person may operate an ATV or UTV without having attained the age of 16.
    - (iii)No person may operate an ATV or UTV without a valid driver's license.
    - (iv)All operators shall have a liability insurance policy in force on any ATV or UTV operated on an ATV/UTV route or trail. The liability insurance policy must have the following minimum coverages:
      - a. \$10,000 for property damage
      - b. \$25,000 for the injury or death of one person
      - c. \$50,000 for the injury or death of more than one person
  - (b) Rules of Operation. The operation of an ATV or UTV on a roadway that is an ATV/UTV route in Marathon County designated pursuant to Wis. Stat. § 23.33(8)(b)1, or an ATV/UTV trail in Marathon County designated pursuant to Wis. Stat. § 23.33(8)(c), is subject to the following rules of operation:
    - (i) Any operator or passenger shall comply with all federal, state, and local laws, orders, regulations, restrictions, and rules, including those outlined in Wis. Stat. § 23.33 and Wis. Admin. Code NR § 64. All ATV/UTV rules of operation outlined in Wis. Stat. § 23.33(3) are adopted and incorporated in this Ordinance.

(ii) Operators may only operate on a designated ATV/UTV route or trail if said route or trail is signed in accordance with Wis. Stat. § 23.33(8)(e) and Wis. Admin. Code NR § 64.12(7).

#### (iii)Speed Limits.

- a. Operators on ATV/UTV routes shall observe a speed limit not to exceed 30 miles per hour or the posted speed limit on the roadway, whichever is less.
- b. Operators on ATV/UTV trails shall observe a speed limit not to exceed 35 miles per hour or the posted speed limit on the trail, whichever is less.
- (iv)Operators shall ride in single file.
- (v) Operators may not operate an ATV or UTV on an ATV/UTV route at any time before or after Operating Hours. Operating Hours are designated as one hour before sunrise and one hour after sunset.
- (vi)All ATVs and UTVs must operate with fully functional headlamps, tail lamps, and brake lights.
- (vii) Every ATV or UTV shall be equipped, maintained, and operated to prevent excessive or unusual noise. No person shall operate an ATV or UTV on an ATV/UTV Route unless the vehicle is equipped with a muffler or other effective noise-suppressing system in good working order and in constant operation.
- (c) Enforcement.
  - (i) Any act that is required or is prohibited by any statute or administrative code provision incorporated herein by reference is required or prohibited by this Code.
  - (ii) The Marathon County Sheriff's Office, local law enforcement agencies, and the Marathon County Parks, Recreation & Forestry Department shall have authority to enforce this Ordinance pursuant to Wis. Stat. § 23.33 (12).
- (d) Penalties.
  - (i) Any forfeiture for a violation of State Statute or Administrative Code adopted by reference in this Ordinance shall conform to the forfeiture permitted to be imposed for violation of said statutes or code provisions as set forth therein.

- (ii) Any violation of a section of this Ordinance without a penalty specified by statute or administrative code shall have a cash deposit requirement of fifty dollars (\$50.00) plus court costs. A cash deposit requirement of onehundred fifty dollars (\$150.00) plus court costs will be required for a second violation of this Ordinance within a 12-month period.
- (7) *Severability.* The provisions of this ordinance shall be deemed severable and it is expressly declared that Marathon County would have passed the other provisions of this ordinance irrespective of whether or not one or more provisions may be declared invalid. If any provision of this ordinance or the application to any person or circumstances is held invalid, the remainder of the ordinance and the application of such provisions to other person's circumstances shall not be deemed affected.

### DOCUMENT NUMBER

### ELECTRIC UNDERGROUND EASEMENT

THIS INDENTURE is made this <u>20th</u> day of <u>September</u>, <u>2019</u>, by and between Marathon County, Wisconsin and Portage County, Wisconsin, municipal corporations, ("Grantor") and WISCONSIN PUBLIC SERVICE CORPORATION, a Wisconsin Corporation, along with its successors and assigns (collectively, "Grantee") for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Grantor, owner of land, hereby grants and warrants to, Grantee, a permanent easement upon, within, beneath, over and across a part of Grantor's land hereinafter referred to as "easement area" more particularly described as follows:

Part of the Southeast Quarter of the Northeast Quarter (SE1/4-NE1/4);

Also, Part of the Northwest Quarter of the Southeast Quarter (NW1/4-SE1/4);

Return to: Wisconsin Public Service Corp. Real Estate Dept. P.O. Box 19001 Green Bay, WI 54307-9001

Parcel Identification Number (PIN) 251-2607-044-9987 251-2607-041-9996 251-2607-044-9999

Also, Part of the Northeast Quarter of the Southeast Quarter (NE1/4-SE1/4);

All being in Section 4, Township 26 North, Range 7 East, **City of Mosinee, County of Marathon, State of Wisconsin**, more particularly described as follows:

A 12 foot wide easement strip described as being the east 12 feet of the said Northwest Quarter of the Southeast Quarter (NW1/4-SE1/4);

Also, A 12 foot wide easement strip described as being the north 12 feet of the west 52 feet of the said Northeast Quarter of the Southeast Quarter (NE1/4-SE1/4);

*Also, A 12 foot wide easement strip, the <u>center line</u> of which is described as follows: Commencing at the southwest corner of the said Southeast Quarter of the Northeast Quarter (SE1/4-NE1/4); Thence S88°50'32''E, 45.98 feet coincident with the south line of said Southeast Quarter of the Northeast Quarter (SE1/4-NE1/4) to the <i>Point of Beginning;* Thence N00°31'21''E, 50.74 feet; Thence N04°57'49''W, 150.34 feet; Thence N60°22'52''E, 202.54 feet; Thence N64°41'28''E, 222.72 feet to the *Point of Termination.* See the <u>attached Exhibit "A".</u>

1. **Purpose: ELECTRIC UNDERGROUND -** The purpose of this easement is to construct, install, operate, maintain, repair, replace and extend underground utility facilities, conduit and cables, electric pad-mounted transformers, manhole, electric pad-mounted switch-fuse units, electric pad-mounted vacuum fault interrupter, concrete slabs, power pedestals, riser equipment, terminals and markers, together with all necessary and appurtenant equipment under and above ground as deemed necessary by Grantee, all to

transmit electric energy, signals, television and telecommunication services, including the customary growth and replacement thereof. Trees, bushes, branches and roots may be trimmed or removed so as not to interfere with Grantee's use of the easement area.

- **2.** Access: Grantee shall have the right to enter on and across any of the Grantor's property outside of the easement area as may be reasonably necessary to gain access to the easement area and as may be reasonably necessary for the construction, installation, operation, maintenance, inspection, removal or replacement of the Grantee's facilities.
- **3.** Buildings or Other Structures: Grantor agrees that no structures will be erected in the easement area or in such close proximity to Grantee's facilities as to create a violation of all applicable State of Wisconsin electric and gas codes or any amendments thereto.
- **4. Elevation:** Grantor agrees that the elevation of the ground surface existing as of the date of the initial installation of Grantee's facilities within the easement area will not be altered by more than 4 inches without the written consent of Grantee.
- **5. Restoration:** Grantee agrees to restore or cause to have restored Grantor's land, as nearly as is reasonably possible, to the condition existing prior to such entry by Grantee or its agents. This restoration, however, does not apply to any trees, bushes, branches or roots which may interfere with Grantee's use of the easement area.
- 6. Exercise of Rights: It is agreed that the complete exercise of the rights herein conveyed may be gradual and not fully exercised until sometime in the future, and that none of the rights herein granted shall be lost by non-use.
- 7. Binding on Future Parties: This grant of easement shall be binding upon and inure to the benefit of the heirs, successors and assigns of all parties hereto.
- 8. Easement Review: Grantor acknowledges receipt of materials which describe Grantor's rights and options in the easement negotiation process and furthermore acknowledges that Grantor has had at least 5 days to review this easement document *or* voluntarily waives the five day review period.
- **9**. **Limitations:** This easement is subject to the following limitations because the "easement area," described above, is located upon, within, beneath, over and across part of an actively operating regional airport established and managed jointly by political subdivisions of the State of Wisconsin, pursuant to authority granted by the state under Wis. Stats., Chap. 114, and subject to regulation by several other state and federal authorities:
  - a. Compliance with Federal Aviation Regulations and Security Requirements. Grantee's access is subject to Federal Aviation Regulations and Federal Airport Security Regulations, including but not limited to 49 CFR Parts 1540 and 1542, and 14 CFR Part 139., and Grantor's policies as outlined in Grantor's Federal Aviation Administration (FAA) approved Airport Certification Manual and the Transportation Security Administration (TSA) approved Airport Security Plan. Grantee further agrees that any fines levied upon Grantor or Grantee through enforcement of these regulations because of violations thereof by Grantee's employees, agents, suppliers, guests, or patrons shall be borne by Grantee to the extent said violations contributed to said fines.
  - b. Interference with Radio and Navigation Aids Prohibited. Grantor operates a varied spectrum of licensed and unlicensed wireless radio, microwave and IP traffic to provide Navigation Aids and other critical safety services to aircraft and personnel as well as other land-based vehicles and equipment. The stable,

reliable and economical delivery of these services has absolute priority over any other uses or operations of Grantee. Therefore, any interference experienced by Grantor that coincides with Grantee's activities will be presumed to be caused by Grantee. Grantor reserves the right to demand Grantee turn off its equipment until all interference problems caused by Grantee are resolved. Once a "shut-off" order is delivered to Grantee, Grantee's equipment must be turned off as soon as possible. Grantor also reserves the right to require Grantee to take any action necessary, in the sole but reasonable discretion of Grantor, to proactively shield or otherwise prevent Grantee's activities from causing interference.

- c. Rules and Regulations of Joint Airport Board. Grantor shall have the right to adopt from time to time, and to enforce, rules and regulations which Grantee agrees to observe and obey with respect to the use of the airport premises and appurtenances, provided that such rules and regulations shall be promptly communicated to Grantee and shall not be inconsistent with safety, current rules and regulations of the FAA and any future changes prescribed from time to time by the FAA.
- d. Protection of Aerial Approaches to Airport. Grantor reserves the right to take any action it considers necessary to protect the aerial approaches of the airport against obstruction, together with the right to prevent Grantee from erecting, or permitting to be erected, any building, any other structure, or operating any vehicles or equipment on the easement area, which, in the opinion of Grantor, would limit the usefulness of the airport or constitute a hazard to aircraft, now or in the future.
- e. Airport Development. Grantor reserves the right to increase the size or capacity of any public aircraft facilities, including but not limited to, runways, hangars, taxi-ways, terminals, navigational facilities or common use portions of the airport, or make alterations thereto or reconstruct or relocate them or modify the design and type of construction thereof or close them or any portions of them, either temporarily or permanently; provided that none of the foregoing shall unreasonably interfere with Grantee's exercise of the easement rights granted hereunder.
- f. Force Majeure. Grantor shall not be responsible to Grantee if the fulfillment of any of the terms of this Easement is delayed or prevented by revolutions or other civil disorders, wars, acts of enemies, strikes, fires, floods, acts of God, adverse weather conditions, legally required environmental remedial actions, or by any other cause not within the control of Grantor.

### R-03-19 RESOLUTION Central Wisconsin Airport Permanent Utility Easement

WHEREAS, Marathon County and Portage County, Wisconsin hereinafter referred to as the Joint Airport Board, each being a municipal body corporate of the State of Wisconsin, is authorized by Wis. Stat. §114.11 (1973), to acquire, establish, construct, own, control, lease, equip, improve, maintain, and operate an airport, and

WHEREAS, the Joint Airport Board desires to develop or improve the Central Wisconsin Airport (CWA), Marathon County, Wisconsin, and

WHEREAS, Wisconsin Public Service (WPS) provides electrical utility service to facilities located at CWA, and

WHEREAS, WPS is replacing existing utility lines on CWA property that have reached end of useful life in new locations on or off CWA property, and

WHEREAS, the new utility locations are more compatible with the use of CWA property than the existing locations, and

NOW, THEREFORE, BE IT RESOLVED that the Central Wisconsin Joint Airport Board resolves and ordains as follows:

Electric Underground Easement by and between the Joint Airport Board and Wisconsin Public Service affecting Parcel Identification Number (PIN) 251-2607-044-9987, 251-2607-041-9996, and 251-2607-044-9999 is hereby approved.

Dated this 20<sup>th</sup> day of September, 2019.

CENTRAL WISCONSIN JOINT AIRPORT BOARD

OFFICE OF HIGHWAY COMMISSIONER 1430 WEST STREET WAUSAU, WI 54401

TO: Infrastructure CommitteeFROM: Jim GriesbachRE: November Highway ReportDate: November 4, 2019

Crews have completed our major paving and construction projects, we will continue to continue working on culvert replacements, ditching, and tree clearing and chipping. We are also crack filling highways.

In October we completed on bi-annual PASER ratings of all Marathon County Highways and will have a report ready for the December Infrastructure report.

We have worked with WisDot in developing an all liquid route for winter maintenance, that road is STH 153 from Oak Road to Rangeline Road. We will still use salt if needed. We have begun getting ready for our 3<sup>rd</sup> high capacity brine maker in Abbotsford. We have installed the storage tanks and expect the high capacity brine maker the week of November 18<sup>th</sup>.

The State of Wisconsin recently releases their state highway salt analysis by county. I am proud to report that Marathon County decreased its salt usage on state highway by 21.73% that is 8<sup>th</sup> best in the state of Wisconsin that was a savings of \$221,451 for salt. The survey does base this on a 5 year average and also is based the winter severity.

We have received a resignation letter from one employee and will begin recruiting for that position. We currently are down several positions due to Federal Family Medical leave coupled with having to train new staff on plowing we are limiting time off request.

I have spoken to representatives of EDP renewables regarding the wind farms in western Marathon County and was informed that due to the demand of the wind turbines, the project will be delayed until 2021.

I currently of three ATV route request waiting for approval from the Town of Hewitt.

Submitted by James Griesbach Highway Commissioner

2015-013	Land Records	Replacement (1	Franscendent)	Projected Start: 5/1/2015	Projected End: 12/31/2018	
	COBOL and oth	er tools that are	as developed in-house over the course of the las no longer considered modern programming lang ave a modern, supportable land records system.			
	A related project is the iSeries upgrade/replacement - The operating system that runs our IBM iSeries has reached end of life. That mid-range host runs Land Records and Social Services. We are in a situation now where we are paying support costs above and beyond normal maintenance to operate that equipment. The system is over 5 years old and hardware maintenance charges continue to increase every year. The plan is to move the load from our in-house iSeries to a cloud solution, then find replacement systems for Land Records and Social Services so that we can stop paying for this system within 3 years.

2019-005	Superion DR Buildout       Projected       Projected         Start: 1/1/1900       End:       6/30/2019					
	- Our present disaster recovery tools do not provide near real time recovery. In addition, the permanent disaster recovery site needs to be further away than the current temporary location at City Hall. Chad Billeb has requested that the Superion system be able to withstand multiple failures and be recovered as close to real time as possible. Through the use of software replication, changes to the servers' data would be written to an alternative data canter. This would allow the ability to fail over in near real time. This may also require the purchase of additional hardware to provide a robust target for the replicated servers.

2013-045	iSeries Replac	cement - Social Services Projected Projected Start: End: 10/1/2016 12/31/2018					
	- Replace Social Services in-house developed application. This is necessary for two reasons. 1) Written in COBOL and we can't find COBOL programmers any more. 2) The iSeries is expensive hardware to maintain and upgrade. Our strategic plan has us moving Social Service and Land Records to new platforms. We alread moved off of IMS21 and the remaining applications like Municipal Courts are also targeted for replacement.

# MARATHON COUNTY MULTI-DEPARTMENT FACILITY SITE SELECTION STUDY

January 15, 2018

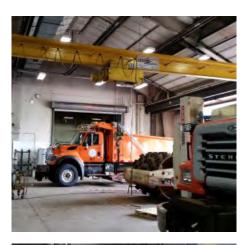

# **TABLE OF CONTENTS**

#### Introduction

Section 1 - Executive Summary	Page 5
Section 2 - Creation of Shortlist	Page 6
Section 3 - Site #1	Page 11
Section 4 - Site #1B	Page 17
Section 5 - Site #2	Page 23
Section 6 - Site #6	Page 29
Section 7 - Site Selection and Recommendations	Page 35

# **INTRODUCTION**

Barrientos Design provided a study to access the spatial building and site needs for a new facility that would include the Highway, Parks, Sheriff and Maintenance Departments. The study identifies the existing and optimal spatial needs for the four departments and looks at how all of these departments could come together in one building. Additionally, space on the site was allocated for a medical examiner's office and emergency management department.

#### PARTICIPATING DEPARTMENTS

As a part of this study we looked at the existing facilities for the Highway, Parks, Sheriff and Maintenance Departments, however, existing condition reports for each building were not required. The following sites and buildings were evaluated

Highway Department – The main highway garage site in Wausau and all associated buildings, including the vehicle storage garage, repair garage, administrative offices, cold storage and salt storage.

City County Parks Department – The main parks garage, cold storage buildings and greenhouse on West Pardee Street.

Sheriff Department – The sheriff currently has space for some staff and repair garage space for their vehicles at 500 Forest Street in downtown Wausau.

Maintenance Department – The Maintenance Department has a facility that is located on the Southeast corner of the Highway Department site. All off the Existing Spaces in these departments were reviewed and existing programs were developed to highlight all existing square footages.

Medical Examiner and Emergency Management Department.

#### OPTIMAL SPACE RECOMMENDED

Based on the "Highway Department Facility Space Needs Analysis Study" that we completed for Marathon County prior to this study it was determined that approximately 145,000 SF would be required for the new main garage. An additional 90,000 SF of Department buildings and sites and reported on their condition, size, and future growth potential in study dated, September 26, 2013, that we will refer to as Volume 1. This study dated March 27, 2014 will be refered to as Volume 2. In Volume 2 we will look specifically at options to resolve site and building concerns addressed in Volume 1.

# **INTRODUCTION**

Similarly to how we determined the optimal square footages for the highway department we met with each the Parks, Maintenance and Sheriff Departments on multiple occasions to discuss their facility needs. Using the optimal square footage room programs that can be found in their entirety later in this report we created a floor plan that effectively captures appropriate departmental adjacencies. This led to a building the has a two story administrative office component, Parks, Highway and Maintenance sharing the main heated vehicle garage and a Sheriff shop located near the main repair garage.

#### OPTIMAL YARD REQUIREMENTS

All the recommended optimal building footprints were then sized to scale and arranged for traffic flow, parking, loading space and allowances for expansion. Each yard building was thoughtfully located nearest the department, in the main building, that it serves. The Highway and Parks Departments follows a set sequence of events for the trucks at night and a separate one for the morning. This sequencing drove the layout and clustering of the site facilities to enhance operations. Including the Main Shop, the ideal site will have two access drives to an arterial road, two fueling stations, truck scale, salt sheds, salt brine, construction material storage areas, recycling and asphalt sheds, stockpiling bins, trash dumpsters and room to stage loadings. In addition to the four departments co-locating on this 40 acre site 2 acres could be made available for the Medical Examiner and Emergency Management Department. From this analysis, we recommend that the new site have at least 40 acres of developable land. Site and building plans can be found later in this report.

Barrientos Design and Consulting began by collecting data on the existing site as well as the twelve to fourteen subject site parcels to first do a top level analysis of each site. After the initial study revealed which sites were still appropriate to pursue, site plans were developed for each site to ensure that the buildings and site functions that were programmed in a previous study could actually fit onto the site. The site plan test fit and other site data that was acquired during this process helped us narrow the list of appropriate sites for the new to 4 sites.

At the end of the study we made recommendations on which sites are the most appropriate for the County's intended use. These recommendations are based on Barrientos Design's long history of working on this project type.

# SECTION 1 EXECUTIVE SUMMARY

**Executive Summary** 

Barrientos Design and Consulting developed a comprehensive list of potentially viable sites for a new mutli-departmental building with the primary user being the Highway Department. Our team was directed to analyze four site options for the future development of this facility. The sites below are the shortlisted options that are investigated in greater detail in this report:

Site #1	Cty Road U & N. 28th Ave. The Witter Farm Wausau
Site #1B	Cty Road U 1607 N 28th Ave. Wausau
Site #2	7709 Stettin Drive / Business park vicinity Wausau
Site #6	Hwy O / County Materials owned quarry Marathon

The initial site review process identified over 14 site locations for sale or in locations that had available land for future development. Many of these sites were reviewed for wetland locations, topography, zoning or development limitations for example at the Rib Mountain locations. Using top level search criteria like distance to the 29/51 intersection, sufficient acreage, and reasonable development costs the initial 14 sites were narrowed to the four sites above. Below is a list of the other ten properties that were preliminarily reviewed.

Site #3	Rachel Lane / Big Rib River Wausau
Site #4	Cty Rd. WW & 5865 N. 32nd. Ave./ Maine
Site #5	Highland Drive & N. Cty Road O / Stettin
Site #5B	7820 Stewart Ave, Business Park Wausau
Site #6B	20 Menard Plz, 2700 Sherman St, Wausau
Site #7	3400 S. Mountain Road, Wausau
Site #8	2211 S. Mountain Road, Rib Mountain
Site #9	405 N. Cty. Road X, Wausau
Site #10	SW Decator Drive Wausau
Site #11	Cty. Road X at Hwy 52 Wausau

Schematic site plans were developed to test if the four shortlisted sites could accommodate the desired building program and other site structures. These four site were each then evaluated in greater detail using additional criteria like land use and zoning compatibility, wetlands, infrastructure improvements and potential for future expansion.

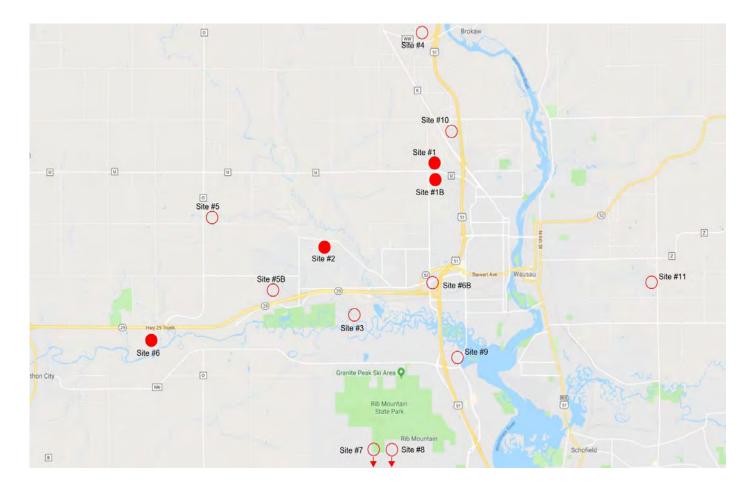

After numerically ranking each of the shortlisted sites by 12 unique criteria it was determined that Site #1B provides the County with the best solution for their future building needs.

# **SECTION 2** CREATION OF SHORTLIST

### Scope and Methodology

The site selection process began by identifying 14 sites located throughout the county but primarily centered around the U.S. Highway 29 and Highway 51 interchange (See image 2.1). After the sites were identified Barrientos Design established site selection criteria based on our initial study and additional information gained from discussions with the Highway Department.

After gathering relevant information for each site including site acreage, zoning classifications, topography, known wetlands and utility service, a top level analysis was done to generate a shortlist of candidate sites that will be analyzed further in the sections.

### All Candidate Site Locations

Below is a description of the location of each of all the 14 candidate sites. You can find aerial maps and topography maps for approved review sites in the Sections 3, 4, 5, & 6 of the report.

Site #1	Cty Road U & N. 28th Ave. The Witter Farm Wausau WI 54401
Site #1B	Cty Road U 1607 N 28th Ave. Wausau 54401.
Site #2	7709 Stettin Drive / Business park vicinity Wausau WI 54401.
Site #3	Rachel Lane / Big Rib River
Site # 4	Cty Rd. WW & 5865 N. 32nd. Ave./ Maine
Site # 5	Highland Drive & N. Cty Road O / Stettin
Site #5B	7820 Stewart Ave, Business Park Wausau, WI 54401
Site #6	Hwy O / County Materials owned quarry.
Site #6B	20 Menard Plz, 2700 Sherman St, Wausau, WI 54401
Site #7	3400 S. Mountain Road, Wausau, WI 54401
Site #8	2211 S. Mountain Road, Rib Mountain, WI 54401
Site #9	405 N. Cty. Road X, Wausau WI 54401
Site #10	SW Decator Drive Wausau WI 54401
Site #11	2211 Cty. Road U Wausau WI 54401

### **Top-Level Site Selection Criteria**

The initial top-level analysis will test each of the 14 sites the following 3 selection criteria points that are of primary concern to the Highway Department's needs.

**Site Selection Criteria 1 – Time &** Distance to State Highway 51 & Hwy 29 Drive time to key interchanges and centrality to County roadway networks, including consideration of roadway improvements to State and County Roads.

**Site Selection Criteria 2 –** Site Size – Sufficient space and usable land available for easy site access, site maneuvering, new building foot print, outbuildings and other site functions.

**Site Selection Criteria 3 –** Cost of Site Development – Including grading, cut and fill, drainage and roadways.

	Candidate Site 1	Candidate Site 1B	Candidate Site 2	Candidate Site 3	Candidate Site 4	Candidate Site 5	Candidate Site 5B	Candidate Site 6	Candidate Site 6B	Candidate Site 7	Candidate Site 8	Candidate Site 9	Candidate Site 10	Candidate Site 11
Criteria 1 Distance to Desired Access Ramps	$\checkmark$	$\checkmark$	$\checkmark$	$\checkmark$	$\checkmark$	$\checkmark$	$\checkmark$	$\checkmark$	$\checkmark$	$\checkmark$	$\checkmark$	×	$\checkmark$	×
Criteria 2 Sufficient Site Size	$\checkmark$	$\checkmark$	$\checkmark$	×	$\checkmark$	$\checkmark$	×	$\checkmark$	×	$\checkmark$	$\checkmark$	$\checkmark$	×	$\checkmark$
Criteria 3 Reasonable Site Development Costs	$\checkmark$	$\checkmark$	$\checkmark$	×	×	×	$\checkmark$	$\checkmark$	$\checkmark$	×	×	$\checkmark$	$\checkmark$	$\checkmark$
Result Sites with red "X" are eliminated from consideration and will not be studied further.	$\checkmark$	$\checkmark$	$\checkmark$	×	×	×	×	$\checkmark$	×	×	×	×	×	×

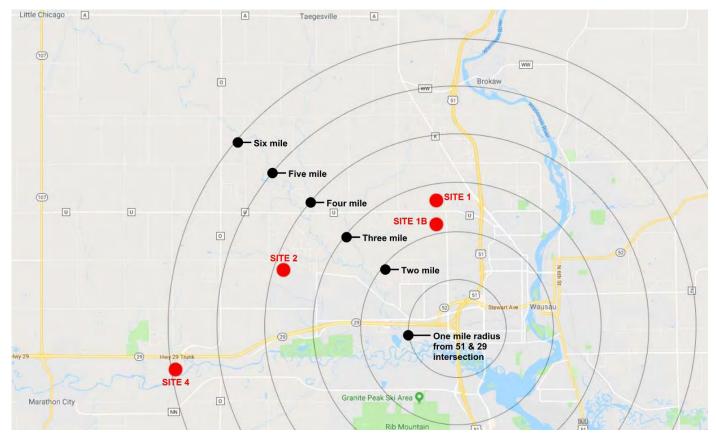

#### Image 2.2

### Candidate Site Shortlist

The map below (image 2.3) shows the locations of sites 1, 1B, 2, and 6. These four sites have been determined to be the best of the 14 sites for the County based on the top-level criteria. Image 2.4 shows the distance to the intersection of Interstate 29 and 51.

#### Image 2.4

#### Zoning Map - New Site Locations

In the image shown below (image 2.5), all four shortlisted sites are located and all four are currently in the County's zoning plan.

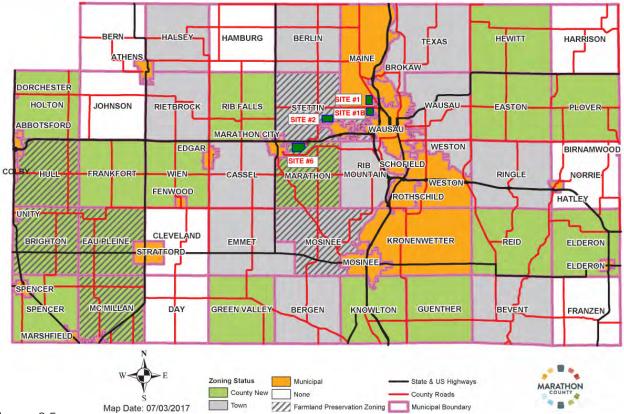

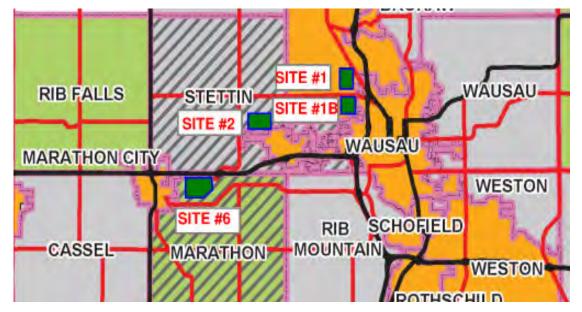

Image 2.5

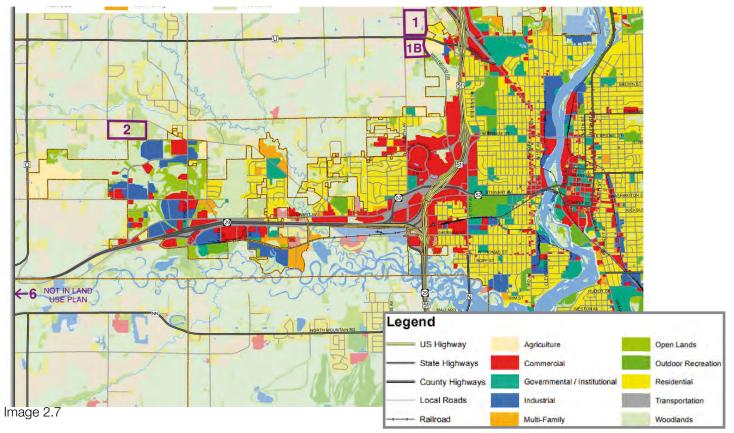

#### Zoning Map - New Site Detail

The image shown below (image 2.6) indicates all of the areas around the new building site and their current zoning.

#### Image 2.6

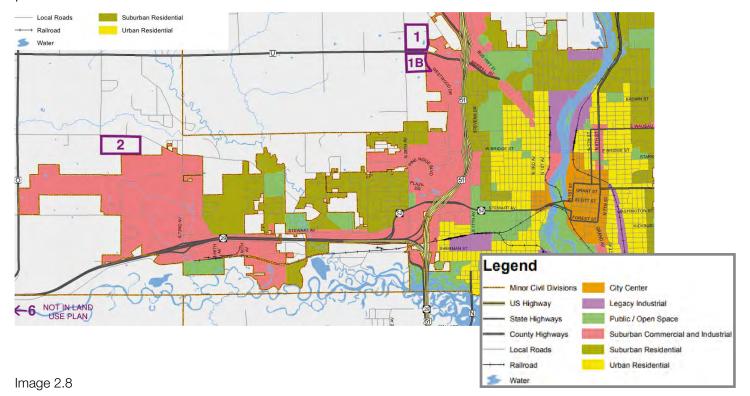

#### Existing Land Use Planning Map with New Site Locations

In the image shown below (image 2.7) all four candidate sites are located.

### Future Land Use Planning Map with New Site Locations

The image shown below (image 2.8) indicates all of the areas around the new sites

# SITE #1

#### Cty Road U & N. 28th Ave. The Witter Farm Wausau

Site #1 Option looks to purchase three parcels of land for a total of 55.36 acres. Multiple properties would need to be purchased in this options and there are several existing structures that would need to be demolished. An existing retention pond could be utilized for storm water management. This is compatible with the future land use plan for the area.

The optimal area plan can fit on the first 40 acre parcel closer to highway U, yet future site expansion could be accommodated with purchase of Northern farm parcel. Topography gets too steep to build on North of the suggested North Property Line.

The property is near an on ramp to Highway 29 and within 3 miles the Highway 51 and 29 intersections. There is potential for a strong economic development potential for the City of Wausau.

## DNR Wetland Map

#### Image 3.6

#### <u>Legend</u>

- Wetlands
  - Wetland Indicators
  - Lakes and open water

# SITE #1B

Cty Road U & 1607 N. 28th Ave. Wausau

Site #1B Option looks to purchase several parcels South of Cty Highway U, East of N 28th Ave and West of 20th Ave. These parcels which do include a few homes would total 42.15 acres.

The topography is relatively flat for the region and appears to be a site that would require less site work than the other options.

Much like Site #1 this is property is near an on ramp to Highway 29 and within 3 miles the Highway 51 and 29 intersections. There is potential for a strong economic development potential for the City of Wausau.

Image 4.1

Image 4.2

Image 4.3

42.15 ACRES

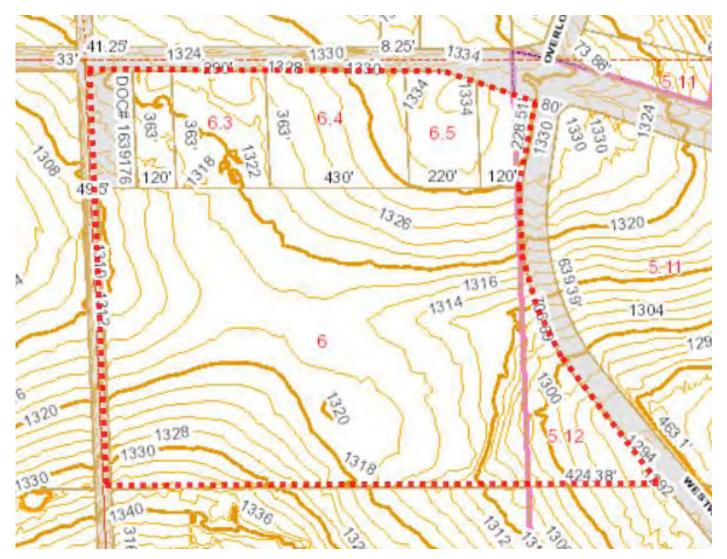

Image 4.5

Image 4.6

#### <u>Legend</u>

- Wetlands
  - Wetland Indicators
    - Lakes and open water

# SITE #2

7709 Stettin Drive / Business Park vicinity Wausau

Site #2 Option looks to purchase two parcels of land for a total of 78.87 acres. The parcel to the west has existing residential farm buildings with open cleared land area. The second east parcel slopes to the south with dense trees at the southern edge. There are wetlands in this area.

Due to topography concerns the optimal site plan does not fit on either 40 acre parcel alone thus requiring the purchase of two parcels. Future site expansion could also be accommodated with purchase of both parcels.

Stettin Drive would require roadway improvements to accommodate the heavy truck traffic that would be coming to and from this site.

The properties to the North are higher end residential and agricultural properties with a different land use however the future land use plan for the area does indicate a commercial zone to the immediate West of this property.

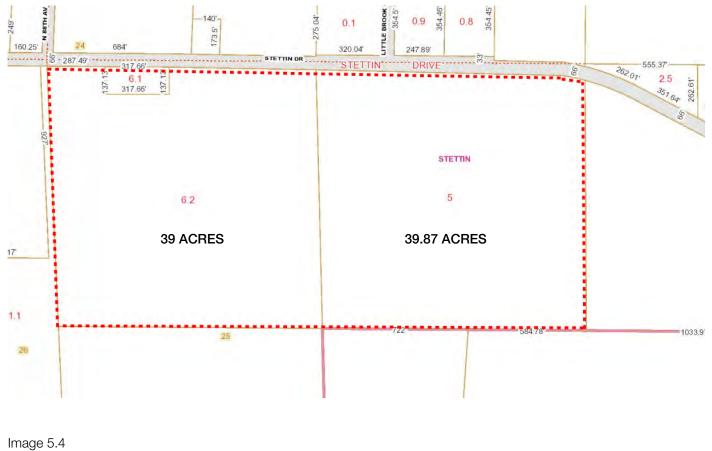

Image 5.1

Image 5.2

Image 5.3

78.87 ACRES

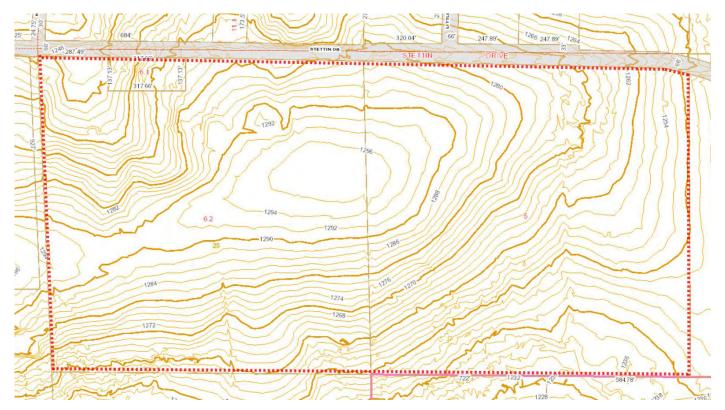

Image 5.5

Image 5.6

#### <u>Legend</u>

- Wetlands
- Wetland Indicators
- Lakes and open water

# SITE #6

Hwy O & Hwy 29 / County Materials owned quarry.

Site #6 Option is currently owned by County Materials for mining operations. The property extends west to 144th Ave. and East to Cty Highway O. The land area is larger than is required at 234 acres with heavily wooded forest and frontage to the Big Rib River to the South. The property is owned by County Materials - Nation Wide LP & Tim Sonnentag - owner of CM Venture. There is a Business TIFF District to the east of Cty Highway O.

The new County buildings could be positioned in the mainly cleared property to avoid some wetlands that are located through the center of forest areas and riverfront lands. The site excavations and grade changes would require significant site work and engineering.

Maintaining a viable access road into the remainder of the property for commercial or parkland use would have to be accommodated in the early stages of site development. The site has close access to Highway 29 on/off ramps but is located furthest away 6 miles from Highway 51 & 29 intersection.

# **SECTION 7** SITE SELECTION AND RECOMMENDATIONS

#### Site Selection Criteria and Matrix

In addition to the top-level criteria that was used to narrow the initial 14 sites down to 4 the following criteria was used to narrow the remaining 4 sites to the one best option for the County. A selection matrix was used to rank the remaining 4 sites.

**Site Selection Criteria 4 –** Expansion Area – Space on the site for expansion of the main building footprint and site functions including potential operation changes in the future.

**Site Selection Criteria 5 –** Access Road Capacity – Sufficient to handle heavy truck loads and volume including ease of making curb cuts and acceleration and deceleration lanes. Also included in this criteria is the amount of site frontage for the preferred multiple vehicle access points onto and off of the site.

**Site Selection Criteria 6 –** Cost to Purchase – Including demolition and environmental clean-up costs.

**Site Selection Criteria 7** – Costs of Infrastructure improvements including utilities and the net effect of potential cost sharing.

**Site Selection Criteria 8 –** Economic Development Impact – The ability for the chosen location and development to spur other similar industrial development in a specific corridor.

**Site Selection Criteria 9 –** Land use compatibility – The buildings ability to fit into the land use plan that the City of Wausau has developed for the selected site.

**Site Selection Criteria 10 –** Existing zoning conformance – the buildings ability to fit into the existing zoning regulations for the selected site.

Site Selection Criteria 11 – Wetlands.

**Site Selection Criteria 12 –** Drainage and stormwater management issues – assessment of the existing site size, topography, and existing or future need for stormwater retention areas.

Based on the Site Selection Criteria, each of the four sites will be numerically evaluated in a matrix and will be assigned a value related to suitability for the new Highway Department Garage. Key site selection criteria will be appropriately weighted. The chart shown on the following page indicates how each site ranked.

		Candidate Site 1		Candidate Site 1B		Candidate Site 2		Candidate Site 6	
	Criteria Weighting Factor	Non-Weighted Rating	Weighted Rating						
Criteria 1 Distance to Hwy 51 & Hwy 29 Access Ramps	1.5	4.0	6.0	4.0	6.0	3.0	4.5	4.0	6.0
Criteria 2 Sufficient Site Size	1.5	4.0	6.0	4.0	6.0	3.0	4.5	5.0	7.5
Criteria 3 Reasonable Site Development Costs	1.5	4.0	6.0	4.0	6.0	3.0	4.5	2.0	3.0
Criteria 4 Adequate Area for Expansion	1.4	3.0	4.2	4.0	5.6	3.0	4.2	5.0	7.0
Criteria 5 Access Road Capacity	1.4	5.0	7.0	5.0	7.0	3.0	4.2	4.0	5.6
Criteria 6 Cost to Purchase	1.2	4.0	4.8	4.0	4.8	3.0	3.6	3.0	3.6
Criteria 7 Infrastructure Improvement Costs	1.3	4.0	5.2	4.0	5.2	3.0	3.9	2.0	2.6
Criteria 8 Economic Development Impact	1.2	5.0	6.0	5.0	6.0	4.0	4.8	2.0	2.4
Criteria 9 Land Use Compatibility	1.2	4.0	4.8	4.0	4.8	3.0	3.6	2.0	2.4
Criteria 10 Existing Zoning Conformance	1.0	4.0	4.0	4.0	4.0	3.0	3.0	2.0	2.0
Criteria 11 Wetlands	1.2	4.0	4.8	4.0	4.8	3.0	3.6	2.0	2.4
Criteria 12 Drainage and Stormwater Management	1.0	4.0	4.0	4.0	4.0	3.0	3.0	2.0	2.0
Total Ranking		49.0	62.8	50.0	64.2	37.0	47.4	35.0	46.5

In this study Barrientos Design and Consulting has identified four options for new sites and has narrowed the initial list of 14 sites for a new Multi-Department Facility to four sites which appear to be the best fit for the County. For the purpose of this recommendation we will on be looking at the following four sites.

#### SITE #1

The Witter Farm north section has the primary merits of being close to the Highway 51/29 intersection, having a large relatively flat terrain that is readily developable, being close to the City of Wausau for annexation and utility extensions, roadway access on three sides with one road being of County highway grade, few surrounding developments that may conflict with a Garage operation and adjacent undeveloped land for development.

The drawbacks to this site are that the County will have to overbuy land to meet the 40 acres needed for the Yard operations and that the price per acre will likely be higher as there are operating farm structures.

For these reasons, Site 1 is our second highest recommended site.

#### SITE #1B

The Witter Farm south section has the primary merits equal to Site 1: relative flat terrain, proximity to Highway 51/29 intersection, close to the Wausau for services and annexation, roadway access on three sides with one being a County highway, few surrounding developments and adjacent land for future expansions. There are three residential structures on the northern edge along County Highway U but these structures are of low economic value.

For these reasons, Site 1B is highest recommended site.

#### SITE #2

These two parcels along Stettin Drive have the primary benefits of being sufficiently large enough to layout the Yard with room for expansion, being relatively close to the Highway 51/29 intersection, and being close to the City of Wausau for annexation and utility services.

The drawbacks to Site 2 are that the topography is very rolling with a knoll right in the middle of the parcels and this will require a significant amount of cut and fill to level off the site. Further, any access road from Stettin Drive will require a driveway that rises up around 20' to reach the complex. Other drawbacks include: there is access to only one road, Stettin Drive is not a heavy duty roadway and the Highway trucks may settle the pavement, the existing land use is agricultural with a mix of higher-end residential.

Site 2 is our third ranked site

#### SITE #6

The parcels owned by County Material offer a large area of land development along with these development benefits: the land may be offered at a low cost (speculative); there would be room for expansion or the addition of other County facilities; the drive time to the Highway 51/29 intersection is moderate; it is a short drive to the Highway 29 access ramp, the site is isolated so there are no competing land uses.

The main drawbacks to Site 6 are; there are piles of fill and excavated holes that are located where the main Garage buildings would be located and these piles are not engineered fill, the site has plenty of elevation changes which will require extensive cut and filling, there are wetland and floodplains nearby on the southern edge of property, it is unknown if County Materials would sell only portions of the entire property, the extension of utilities would likely come from Marathon City, and finally, the City/County Parks Department would likely not relocate to Marathon City.

Site 6 is our fourth ranked site.

With our recommendation of developing on Site #1B, we advise the County to move on the following issues:

- Approach the property owners to review purchasing potential.
- Meet with the City to determine the costs of extending Water and Sewer services. Determine if the County will have to pay for the full portion of the improvements. Identify the likely time required for implementing the services.
- Assess the pavement condition of Roads and if it has a poor rating for heavy trucks, determine the costs to improve the road. Also include the costs of additional lanes for turning, acceleration and de-acceleration.
- Procure a full survey of the selected property including: property lines, easements and covenants, topography, utilities, roadways and any structures.
- Explore soils conditions through County available GIS maps. If negotiations proceed further, conduct an exploratory soils boring program to determine composition, bearing capacity and water table height.
- Determine costs of connecting other utilities: power, gas, telecommunications.
- Meet with the City of Wausau to gain approval for Annexation of parcel. Identify approval process and timeline.
- Meet with the Municipality to review any land use, zoning and traffic issues that may arise from this development. Identify required submittals and permits along with their timelines.
- Once this site information is obtained, develop a Design Development building plan and site plan to verify that the design program is for each department adequately met.
- Develop cost estimate of the building and site.
- Conduct preliminary review meetings with the local planning authorities for concurrence on the land use, density, building design, traffic impact and utility capacity.

These items could be addressed in a due diligence report and a design development effort. A due diligence report would be completed on the one preferred site and we would conduct some preliminary engineering and in depth analysis of all site components prior to the County purchasing the site. The Design Development effort would take place after the property has been purchased and include plan development and preliminary engineering of the building and site by an engineering team.

# **MARATHON COUNTY** Multi-Department Facility Study

OCTOBER 18, 2016 FINAL REPORT

## **Table of Contents**

- 4. Existing Building Program Spaces
- 5. Optimal Square Footage Recommended
  - a. Tabulation of recommended square feet by room or function
  - b. Optimal facility design criteria narrative
  - c. Comparison of existing square feet to optimal square feet.
- 6. Concept Building and Site Plans
  - a. Optimal Hypothetical Site Plan
  - b. Optimal Floor Plans Overall and by Department
- 7. Conceptual Cost Estimate

## SECTION 1 EXECUTIVE SUMMARY

#### SCOPE OF STUDY

The focus of this study is to assess the spatial building and site needs for a new facility that would include the Highway, Parks, Sheriff and Maintenance Departments. The study identifies the existing and optimal spatial needs for the four departments and looks at how all of these departments could come together in one building. Additionally, space on the site was allocated for a medical examiner's office and emergency management department.

#### **EXISTING SPACE COMPOSITION**

As a part of this study we looked at the existing facilities for the Highway, Parks, Sheriff and Maintenance Departments, however, existing condition reports for each building were not required. The following sites and buildings were evaluated

- Highway Department The main highway garage site in Wausau and all associated buildings, including the vehicle storage garage, repair garage, administrative offices, cold storage and salt storage.
- **Parks Department** The main parks garage, cold storage buildings and greenhouse on West Pardee Street. We did not walk through the administrative building however it is included in this study.
- Sheriff Department The sheriff currently has space for some staff and repair garage space for their vehicles at 500 Forest Street in downtown Wausau.
- **Maintenance Department** The Maintenance Department has a facility that is located on the Southeast corner of the Highway Department site.

All off the Existing Spaces in these departments were reviewed and existing programs were developed to highlight all existing square footages.

#### **OPTIMAL SPACE RECOMMENDED**

Based on the "Highway Department Facility Space Needs Analysis Study" that we completed for Marathon County prior to this study it was determined that approximately 145,000 SF would be required for the new main garage. An additional 90,000 SF of cold and tempered storage would be required for other site structures.

Similarly to how we determined the optimal square footages for the highway department we met with each the Parks, Maintenance and Sheriff Departments on multiple occasions to discuss their facility needs. Below please find the square footage comparision chart between each departments existing and optimal square footages.

### **Optimal Room Program for Central Highway Garage**

Consolidated Building Square Footage Comparison

10/19/2016

MAIN SHOP BUILDING - COMPARISON CHART									
FUNCTIONAL AREA	Existing SF	Optimal SF	% of Change						
Main Building									
Highway	61,285	146,381	138.85%						
Maintenance	21,947	24,298	10.71%						
Parks	48,302	51,655	6.94%						
Sheriff	4,220	9,726	130.49%						
Yard Buildings									
Highway	44,392	90,661	104.23%						
Maintenance	N/A	N/A							
Parks	15,233	15,292	0.39%						
Sheriff	N/A	4,048							
Grand Total Main Building Grand Total All Buildings	<b>135,753</b> 195,378	<b>232,059</b> 342,060	<b>70.94%</b> 75.08%						

Using the optimal square footage room programs that can be found in their entirety later in this report we created a floor plan that effectively captures appropriate departmental adjacencies. This led to a building the has a two story administrative office component, Parks, Highway and Maintenance sharing the main heated vehicle garage and a Sheriff shop located near the main repair garage.

#### OPTIMAL YARD REQUIREMENTS

All the recommended optimal building footprints were then sized to scale and arranged for traffic flow, parking, loading space and allowances for expansion. Each yard building was thoughtfully located nearest the department, in the main building, that it serves. The Highway and Parks Departments follows a set sequence of events for the trucks at night and a separate one for the morning. This sequencing drove the layout and clustering of the site facilities to enhance operations.

Including the Main Shop, the ideal site will have two access drives to an arterial road, two fueling stations, truck scale, salt sheds, salt brine, construction material storage areas, recycling and asphalt sheds, stockpiling bins, trash dumpsters and room to stage loadings.

In addition to the four departments co-locating on this 40 acre site 2 acres could be made available for the Medical Examiner and Emergency Management Department.

From this analysis, we recommend that the new site have at least 40 acres of developable land. Site and building plans can be found later in this report.

#### CONSTRUCTION COSTS

Based on the conceptual building and site plans the Architect estimates the construction costs as follows:

### Marathon County Multi-Department Public Works Facility

Schematic Design - Construction Cost Estimate for 2020 Barrientos Design & Consulting, Inc.

Main Building	SF/Quantity	Cost per SF		Total
Shared - Vehicle Parking Garage	105,890	120	\$	12,706,800
Shared - Vehicle Wash Bay	3,960	160	\$	633,600
	109,850	Shared Subtotal	\$	13,340,400
Highway				
Highway - Repair Garage	23,964	170	\$	4,073,880
Highway - Parts Storage	14,462	130	\$	1,880,060

### **SECTION 2** STUDY SCOPE AND METHODOLOGY

We understand that a Master Plan, completed in 2007, identified the need for a larger parcel of land for the Highway Department's primary garage and shop operations. After we completed the initial study of the Highway Department Marathon County asked that we add the Parks, Maintenance and Sheriff Departments to the scope of the study. The goal of this new study would be to consolidate all of these Departments onto one site.

Primarily, this Multi-Departmental Space Needs study examines the spatial needs for each group in their main facility and yard facility and set the design criteria for a future site selection process. For this effort Barrientos Design provided architectural and engineering planning services and tasks as follows:

Space Needs Assessment

- 1. Conduct onsite interviews with key Department staff.
- 2. Document existing facility data: existing building and site plans, current square footage, staffing organization, major equipment usage, relationship and traffic patterns and expansion needs.
- 3. Identify all functions that need rooms. Document the major activities, clearances, heights, equipment pieces, and staff count for each. This includes office areas, equipment storage, shops, crew quarters and cold/bulk storage.
- 4. For personnel, identify which positions can be open workstations and which need private offices.
- 5. Identify common support functions such as staff meeting rooms, conference rooms, restrooms, copy room, break rooms and lobbies, recommend an appropriate sizing and distribution.
- 6. Examine potential to share rooms between Departments. Identify those functions that need separation physically, acoustically and for management purposes.
- 7. Identify security and chain of custody sequences.
- 8. Identify site or yard functions for each of the Departments. Assess where these functions can be shared with other Departments. Compare the recommend square footage with the existing SF allocations.

- 9. Summarize space needs in a room tabulation that lists each room and assigned sizes. The tabulation will account for circulation and mechanical spaces.
- 10. Review with Highway Department, the impact of colocating functions under one-roof. Identify where Highway functions can be shared with the other Departments. Also, identify functions that are best kept separated from Highway's.
- 11. Develop up to three alternate floor plan arrangements for this combined Department Maintenance Facility.
- 12. Set the size and configuration for Cold Storage building and Yard facilities.
- 13. Set site design requirements: parking counts, accessibility, security, delivery, loading, staging and other site facilities. Provide a rough estimate for sizing a stormwater detention pond.
- 14. Develop up to three alternate site arrangement plans illustrating how all the Departments use the Yard. Make a recommendation on the overall Parcel size.
- 15. Compare increases in building square feet and yard area between existing conditions and proposed recommended facility.
- 16. Present findings in a report format with space tabulations, relationship diagrams, building plans, site plans, cost estimate and technical narrative describing key features. The report will be provided a PDF format along with 10 printed copies.
- 17. We will provide up to two technical presentations. We will provide up to five days of working and progress meetings on site.

Our scope did not include the following:

- 1. Identifying and assessing new sites
- 2. Combining the other Highway Department Satellite Shops into this program
- 3. 3D renderings of the site concepts
- 4. Detailed site design including grading, stormwater, utilities and lighting
- 5. Wetland identification and permitting
- 6. Traffic studies
- 7. Environmental studies
- 8. Landscape Architecture
- 9. Brownfield development analysis
- 10. Extensive engineering reviews
- 11. Detailed existing condition drawings of the building or site features
- 12. Meeting with City planning officials

#### SCHEDULE

Barrientos Design provided this study starting in August of 2016 and completed the work end of October 2016. Meetings were held bi-weekly for onsite interviews, study updates and input on the plans developed. Only County staff had input into the planning process along with our consultants.

### **SECTION 3** TEAM PARTICIPANTS

The creation of this study was conducted with the participation of the following team members:

Architect: Barrientos Design & Consulting, Inc. Norman Barrientos, AIA Lead Planner/Principal Doug Forton, Barrientos Design, Associate Architect Planner Engineer: Ayres Associates Michael Stoffel, PE, Civil Engineer Sr. Project Manager Jim Griesbach, Marathon Co. Highway Commissioner Jeff Koppa Marathon Co. Equipment Supervisor Todd Evers, Marathon Co. Lead Mechanic Foreman Jeff Hahn Marathon Co. Purchasing Specialist Mickey Krautkramer, Marathon Co. Welder Michael Lotter, Marathon Co. Facilities Director Troy Torgerson, Marathon Co. Facilities Planner Dan Fiorenza, Marathon Co. Parks Operations Superintendent Jason Plaza, Marathon Co. Sheriff Department

### **SECTION 5** OPTIMAL SQUARE FOOTAGE RECOMMENDED

In the following documents, Barrientos Design analyzed what rooms were needed, their sizing, equipment to be housed, and how many people would occupy the spaces. Presented in a spreadsheet form the Room Tabulation thoroughly lists every room needed for all departments as well as the sizing of the Storage structures.

Vehicle storage is a major component for all departments and therefore in the optimal programs we identified all heavy, medium and light duty vehicles as well as any small equipment storage needs.

Using the Highway Department plan from the Highway Department study as the basis to further develop a plan with an expanded program we added each department.

The large heated parking garage was expanded to include space for Parks and Maintenance vehicles. The Parks administrative offices and shops were then located adjacent to the majority of their vehicle parking. The Maintenance administrative offices were located with their long term storage needs on the second floor above the Highway department offices and an elevator and stairs were added as required. The Maintenance department has easy access to their vehicles however they do handle several deliveries per day out of their office and the distance from the offices to their garage space is significantly further than the current configuration of their building.

The Sheriff repair shops and vehicle bays are located at the end of the Highway repair garage. Locating this group here will allow for sharing of certain tools, air compressors and cranes if necessary.

The site layout was driven by department adjacencies and the sequence that highway and parks vehicles take at the start and end of each day. Maintaining enough clearance for vehicles to pass one another and allowing appropriate turning radii for larger vehicles to enter and exit not only the building but remote portions of the site.

#### **OPTIMAL FACILITY DESIGN CRITERIA NARRATIVE**

#### **HIGHWAY DEPARTMENT**

GeneralThe Wausau Highway Garage acts as the centralFacilityShop for the County's Highway DepartmentFunctionsbuilding facilities. The main functions that are<br/>performed here are grouped as follows:

**Parking Garage**: Parking of fleet vehicles including tri-axle plow trucks, single-axle plow trucks, specialized trucks, graders, loaders, one-ton trucks with a drive-thru configuration.

**Repair Garage**: Repair and preparation of all Highway vehicles and equipment.

**Welding and Fabrication**: Metals welding and fabrication shop adjacent to repair garage including material storage and equipment area.

**Repair Shops**: including shops for Tires, Hydraulic/Hoses, Sign/Carpentry Shop, Sign & Marking Shop and Stock Storage.

**Wash Bay**: Truck and other vehicle wash bay, drive-through approach.

**Shop Offices and Parts Storage**: Workstations for Shop and Parts staff, loading area, vehicle parts, field equipment, tool storage, parts ordering and vendor vestibule.

**Crew Quarters:** Vehicle operator and mechanics locker rooms, lunch room, assembly and safety training.

Administrative and Engineering Offices: Reception, accounting, Commissioner, engineering and records storage and public meeting rooms.

**Highway Operations**: Offices for Patrol Superintendents, record storage and control center.

- Facility Area145,038 GSF required to house all these<br/>functions. See Optimal Room Program<br/>tabulation for SF breakdown of the above<br/>functions and for each room
- Staff andHeated Parking Vehicle Stall Count:Vehicle1. Heavy parking stalls, 17Count2. Medium parking stalls, 19
  - 3. Light duty parking stalls, 31

#### Tempered Storage Stall Count:

- 1. Heavy parking stalls, 13
- 2. Medium parking stalls, 2
- 3. Light duty parking stalls, 8

Cold Storage Stall Count:

- 1. Heavy parking stalls, 17
- 2. Medium parking stalls, 2
- 3. Light duty parking stalls, 46

Department Staffing Count, whole Department

- Operators & Field Crew, Sign Marking, 56
- 2. Highway Patrol Supervisors, 5
- 3. Equipment Supervisor & Parts Clerks, 3
- 4. Mechanics & Welders, Fuel man, 11
- 5. Highway Engineering, 1
- 6. Commissioner and Administrative, 4

Total Department staff: 80

Lockers needed for Operators, field crews, sign marking, Patrol Supervisors, Shop Supervisors, Parts Clerks, Mechanics and Welder. Total locker count for Highway Department main shop at Wausau is 54.

#### Site Facilities

1. Salt Storage Buildings: one 8,000 ton

2. Salt Brine Mixing Facility.

- 3. Tempered Storage Buildings, heated to 55 degrees minimum
- 4. Cold Storage Building, no heating
- Fueling Stations, Diesel, Unleaded, dispensing stations for each with canopies.
- 6. Truck Scale. Wash Pad, at entry and exit

	<ul> <li>of Truck Wash</li> <li>7. Material Storage Bins with concrete surrounds and shed roof.</li> <li>8. Construction material storage</li> <li>9. Miscellaneous equipment parking</li> <li>10. Visitor Parking.</li> <li>11. Staff Parking.</li> <li>12. Perimeter Fencing and entry gates.</li> <li>13. Stormwater detention system</li> <li>14. Entry landscaping and Flagpole</li> </ul>
Exterior Personnel Vehicle Parking	Provide parking for Wausau staff of 58 plus 12 Committee/Public Visitors and 9 for visiting Satellite Shop staff. Total of 79 parking stalls outside
Allowance for Future Growth	Factors that will affect the mix of staff, fleet and repair equipment are driven by any changes in lane miles or level of services for particular road segments. To a lesser degree population counts and road traffic counts can also affect the Highway Department operations.
	Through discussions with County Highway personnel, it was gathered the number of lane miles and level of service will not change significantly for the next two decades. No more 4-lane developments are planned but there will be more conversion of rural roads to urban roads.
	On the other hand population and traffic counts will rise over the next two decades. Based on Wisconsin DOA projections, Marathon County will see a population increase of 13% over the next thirty years. Today's population is approximately 135,000 while in 1960 it was around 88,000 and then in 1980 it jumped to 110,000 people.
	The DOA projection for the population in 2040, some 24 years out, is 142,000. From 1960 to 2040, there will have been a 61% increase in population for the County. As the bulk of the Main Shop was already built out by 1960, the Main Shop today is serving a constituency with 54% more people in the County.

Regarding the mix of fleet and staff it is expected that there will be up to 4 new patrol trucks acquired and that two new positions will be filled in the next three years.

In this industry, what we are seeing is lean staffing that is leveraged with more equipment to perform a greater variety of tasks. Not only have patrol trucks grown in size but there is a greater variety of vehicles and equipment pieces to perform specific functions. To allow for these future changes, it is best to have flexible vehicle parking space combined with a mix of cold storage space.

We believe that a parking garage designed to hold 65 pieces of equipment will handle future growth and allow for flexible parking arrangements. For the equipment storage needs, we recommend the County provide 62,000 SF of storage space: with 24,000 SF being tempered heated storage and 38,000 SF being cold storage.

#### PARKS DEPARTMENT

GeneralThe Parks Garage on Pardee Street acts as the<br/>central Parks location for the County and CityFunctionsParks Department building facilities. The main<br/>functions that are performed here are grouped<br/>as follows:

**Parking Garage**: Heated Parking of fleet vehicles primarily including one-ton trucks with trailers, several larger dump/plow vehicles, and smaller equipment such as mowers.

**Repair Garage**: Repair and preparation of all Parks vehicles and equipment. One heavy-duty bay and three light-duty bays.

**Welding and Fabrication**: Metals welding and fabrication shop adjacent to repair garage including material storage and equipment area.

**Repair Shops**: including shops for Sign/Carpentry and Paint Shop

Wash Bay: Truck and other vehicle wash bay, drive-through approach. Shop Offices and Parts Storage: Workstations for Shop Clerk, loading area, vehicle parts, field equipment, tool storage, parts ordering and vendor vestibule. Crew Quarters: Staff locker rooms, lunch room, assembly and safety training. Administrative and Engineering Offices: Reception, superintendent, asst. director, recreation superintendent, recreation manager, ranger, forestry department, office administrative staff, records storage and public meeting rooms. Facility Area 51,655 GSF required to house all these functions. See Optimal Room Program tabulation for SF breakdown of the above functions and for each room Staff and Heated Parking Vehicle Stall Count: Vehicle 1. Heavy parking stalls, 5 (plus 1 future) 2. Light duty parking stalls, 46 Count 3. Small equipment bays, 10 Tempered Storage Stall Count: 1. Light duty parking stalls, 10 Department Staffing Count, whole Department 1. Trade Tech, 6 2. Mechanics. 2 3. Park Maintenance, 15 4. Electrician, 1 5. Inventory Clerk, 1 6. Seasonal, 35 7. Administrative Staff, 14 Total Department staff: 74 Lockers needed for trade tech, mechanics, parks maintenance and season staff, electrician, and inventory clerk. Total locker count for Parks

Department is 60.

Lean-to storage Construction material storage Miscellaneous equipment parking Visitor Parking. Staff Parking. Perimeter Fencing and entry gates. Stormwater detention system
Exterior Personnel Vehicle Parking		e parking for Parks staff of 74 plus 6 s. Total of 80 parking stalls outside
Allowance for Future Growth	depart next 20 male a	cant future growth of the parks ment staff and fleet is not expected in the D years however a changing balance of nd female employees may require a e in required locker counts over time.

#### MAINTENANCE DEPARTMENT

General<br/>FacilityThe Facilities Maintenance Department is<br/>responsible for providing preventative<br/>maintenance and custodial services for all<br/>county owned buildings. The main functions<br/>that are performed here are grouped as follows:Administrative Offices:<br/>planners and accounting offices as well as plan

planners and accounting offices as well as plan & record storage, collaborative space and a conference room for CIP committee meetings.

**Parking Garage**: Parking of fleet vehicles including a moving truck, eight light-duty vehicles and space for some small equipment.

	<b>Repair Shops</b> : A heated workshop for general maintenance and repair of county equipment, machinery and furnishings.							
	<b>Crew Quarters:</b> Space for crew locker rooms, multi-purpose room for assembly and safety training and storage for uniforms.							
	<b>Storage</b> : Facilities maintenance is responsible for the storage of furniture and equipment, long term county records for many departments and short and long term plan record storage.							
Facility Area	24,298 GSF required to house all these functions. See Optimal Room Program tabulation for SF breakdown of the above functions and for each room							
Staff and Vehicle Count	<ul><li>Heated Parking Vehicle Stall Count:</li><li>1. Medium parking stalls, 1</li><li>2. Light duty parking stalls, 8</li><li>3. Small equipment stalls, 2</li></ul>							
	<ul> <li>Department Staffing Count, whole Department</li> <li>1. Facilities Director, 1</li> <li>2. Deputy Director Healthcare, 1</li> <li>3. Facility Planner, 2</li> <li>4. Accounting, 2</li> <li>5. Maintenance Tech, 3</li> <li>6. HVAC Specialists, 2</li> </ul>							
	Total Department staff: 11							
	Lockers needed for Maintenance Tech and HVAC Specialists as well as 4 additional for future growth. Total locker count is 9.							
Site Facilities	<ol> <li>Parking for 15 staff and 5 visitors</li> <li>Dedicated entry door for visitors that need access to long term storage with a key card.</li> </ol>							
	3. Allocated space for deliveries of custodial and other maintenance supplies.							

Allowance	The primary growth that is seen in this
for Future	department is not in personnel but in the long
Growth	term storage needs of all county departments.
	As such addition space for future growth in this
	area has been accounted for in the square
	footage as seen in the optimal square footage
	room tabulations.

#### SHERIFF DEPARTMENT

General Facility Functions	The Sheriff Department repair garage facility maintains and prepares squad vehicles for department use. The main functions that are performed here are grouped as follows:
	<b>Repair Garage</b> : Repair and preparation of all squad vehicles and equipment. Four service bays and three lifts are required
	<b>Shop Offices and Parts Storage</b> : Workstations for mechanics, storage of vehicle parts, tool storage, parts ordering and vendor vestibule.
	<b>Radio Technologies</b> : Includes an office workbench and storage for a radio technician.
	<b>Repair Shops</b> : including shops for tires, bulk fluids, Parts Stock Storage and long term storage on a mezzanine.
	<b>Vehicle Inventory Parking</b> : Parking of 8 to 10 vehicles in a tempered environment.
	<b>Offices</b> : Two offices for patrol officers to work and wait while vehicles are having routine maintenance performed.
Facility Area	9,726 GSF required to house all these main building functions. A yard building of approximately 4,000 GSF for impound is also required. See Optimal Room Program tabulation for SF breakdown of the above functions and for each room

Staff and Vehicle Count	Heated Repair Bay Stall Count: 1. Light duty parking stalls, 4 Tempered Storage Stall Count: 1. Light duty parking stalls, 10
	Department Staffing Count, whole Department 1. Mechanics, 2 2. Radio Technician, 1
	Total Department staff: 3
	Four gun lockers are required to safely store firearms from the squad cars while being serviced.
Site Facilities	<ol> <li>Tempered Heated Storage Garage, for 10 squad vehicles</li> <li>Visitor Parking.</li> <li>Staff Parking.</li> </ol>
Exterior Personnel Vehicle Parking	Provide parking for three staff plus two vendors. Total of 5 to 7 parking stalls outside
Allowance for Future Growth	The Sheriff repair garage facility will not see much future growth. Perhaps an additional mechanic in the future could work out of this facility however it will probably not change the required square footage.

Grand Total All Buildings	191,553	342,060	78.57%

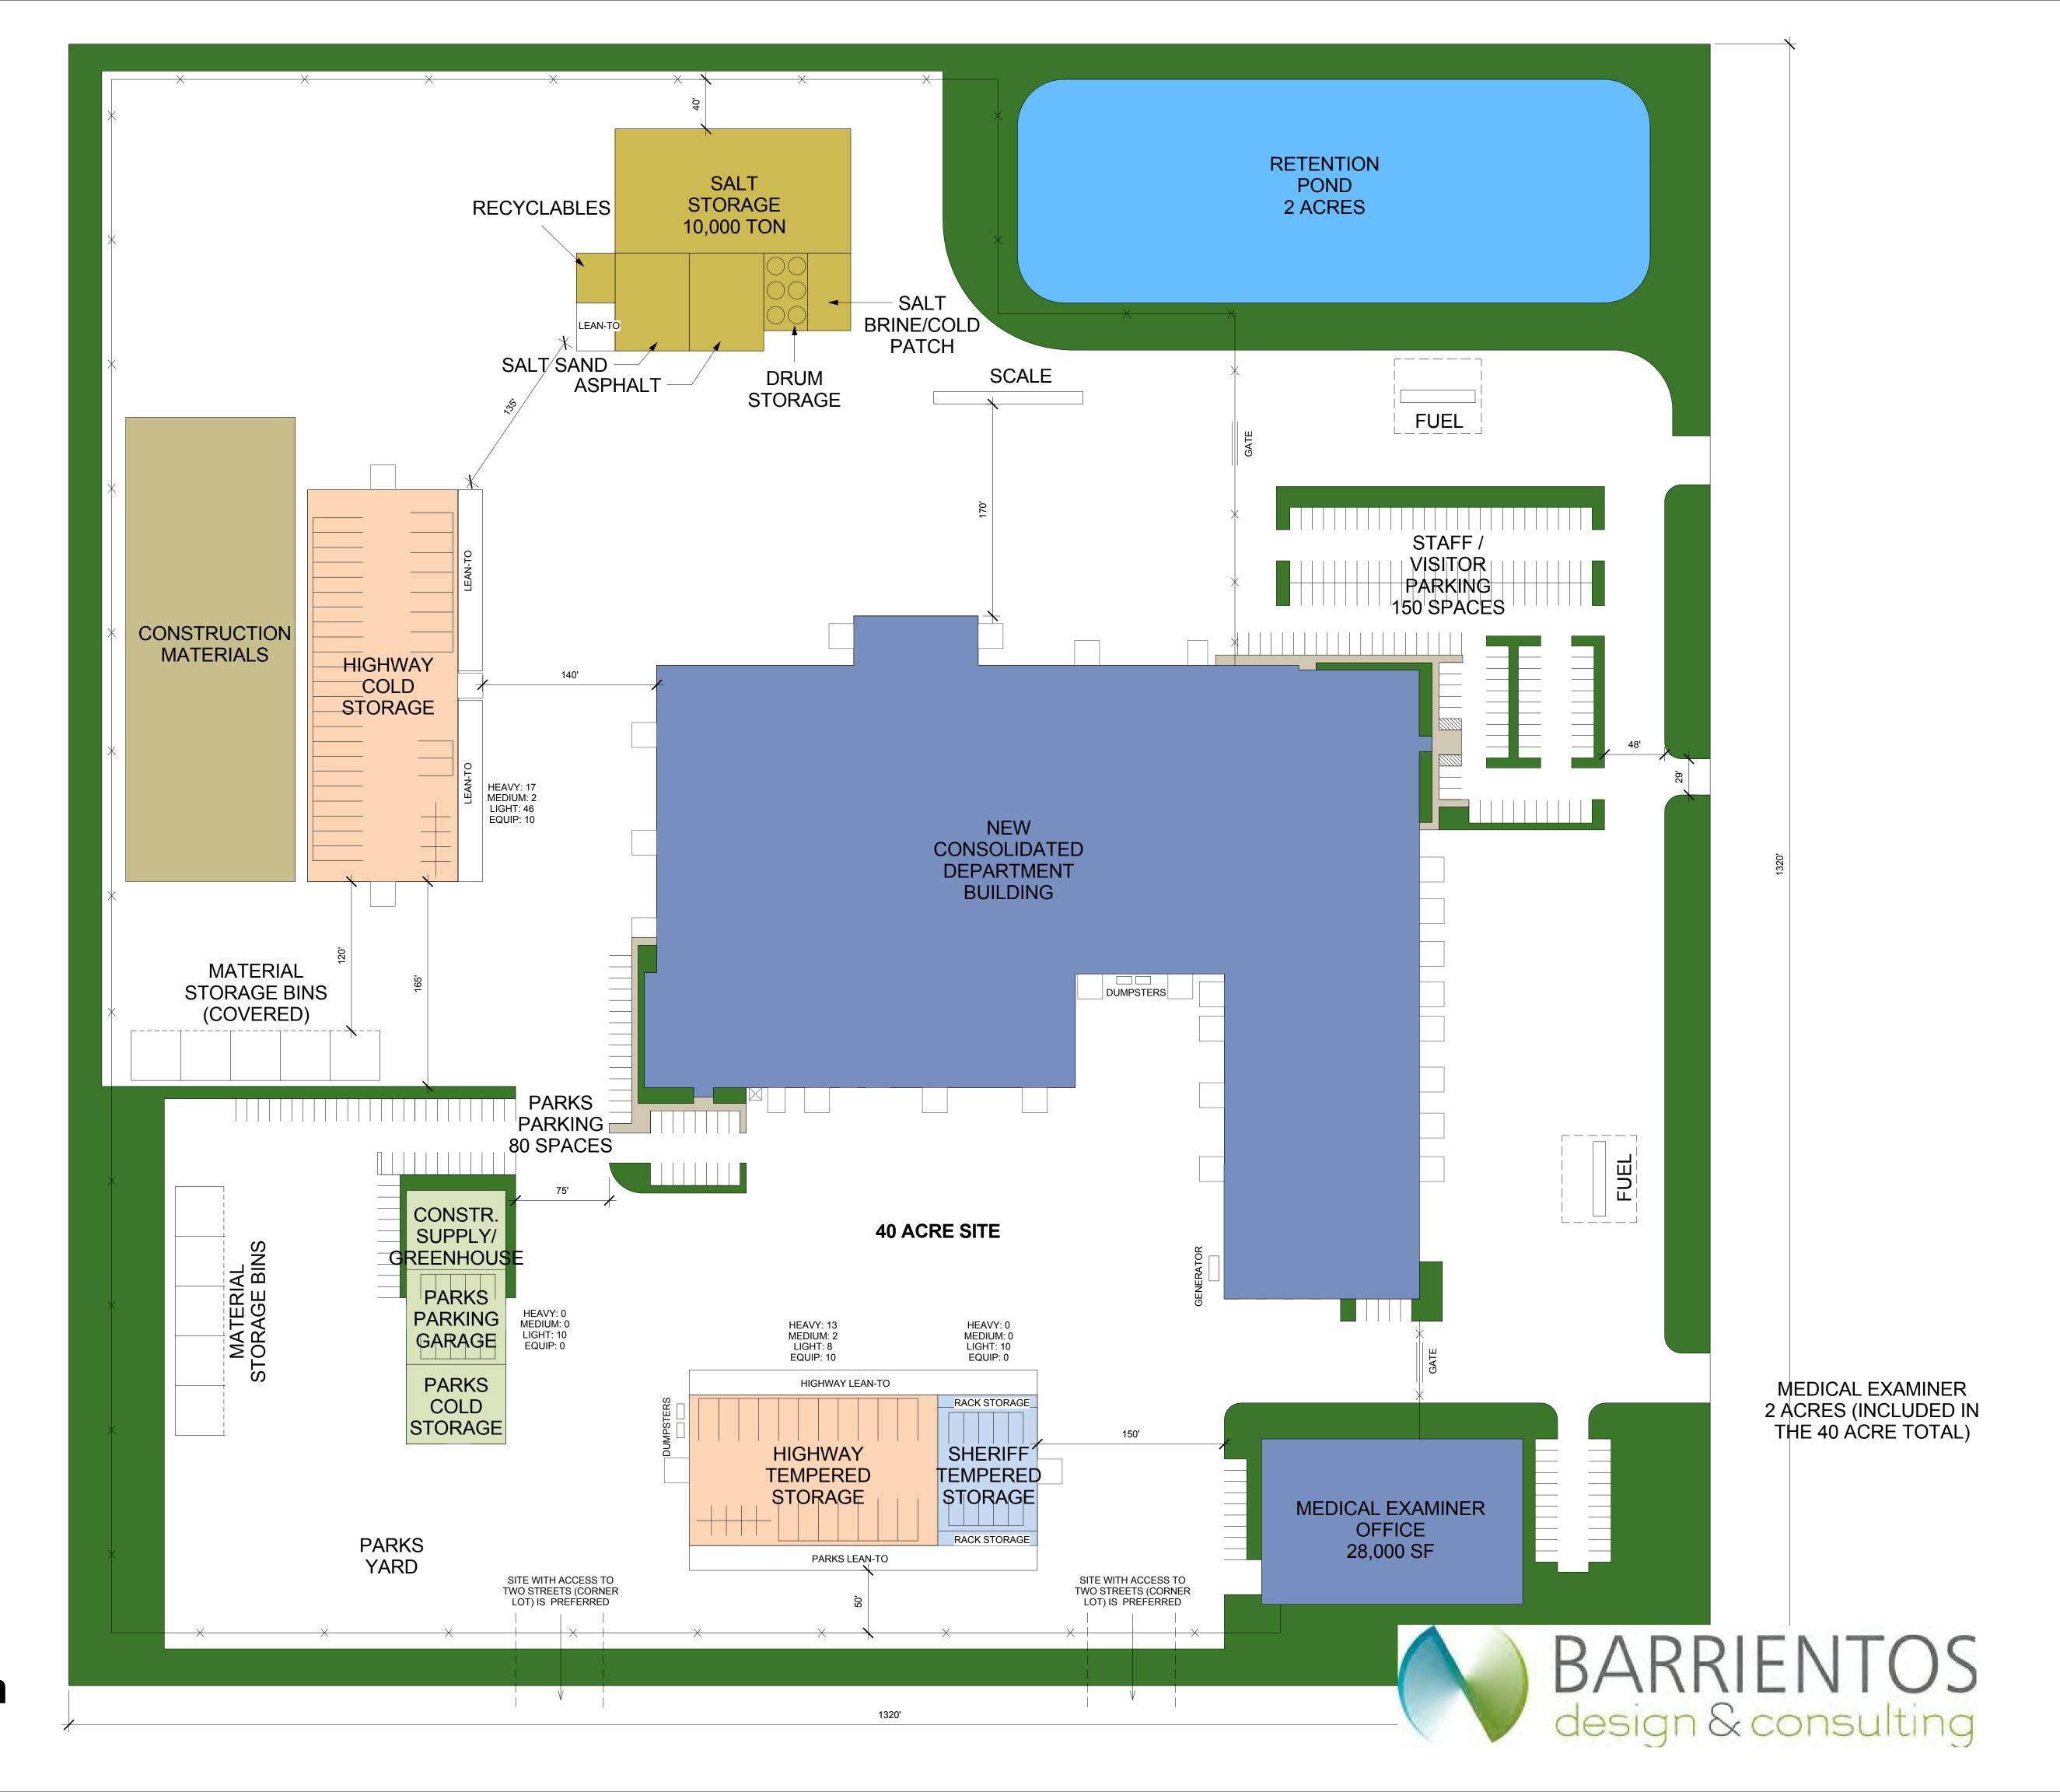

### **SECTION 6** CONCEPT BUILDING AND SITE PLANS

#### **HYPOTHETICAL 40 ACRE SITE**

This is located on a hypothetical 40-acre site that is square in shape. There is ample room for staff parking adjacent to the administration and crew quarters. Construction material stockpiling and a new 2 acre storm water retention pond would be located on-site. One new salt shed is proposed for combined County and State storage.

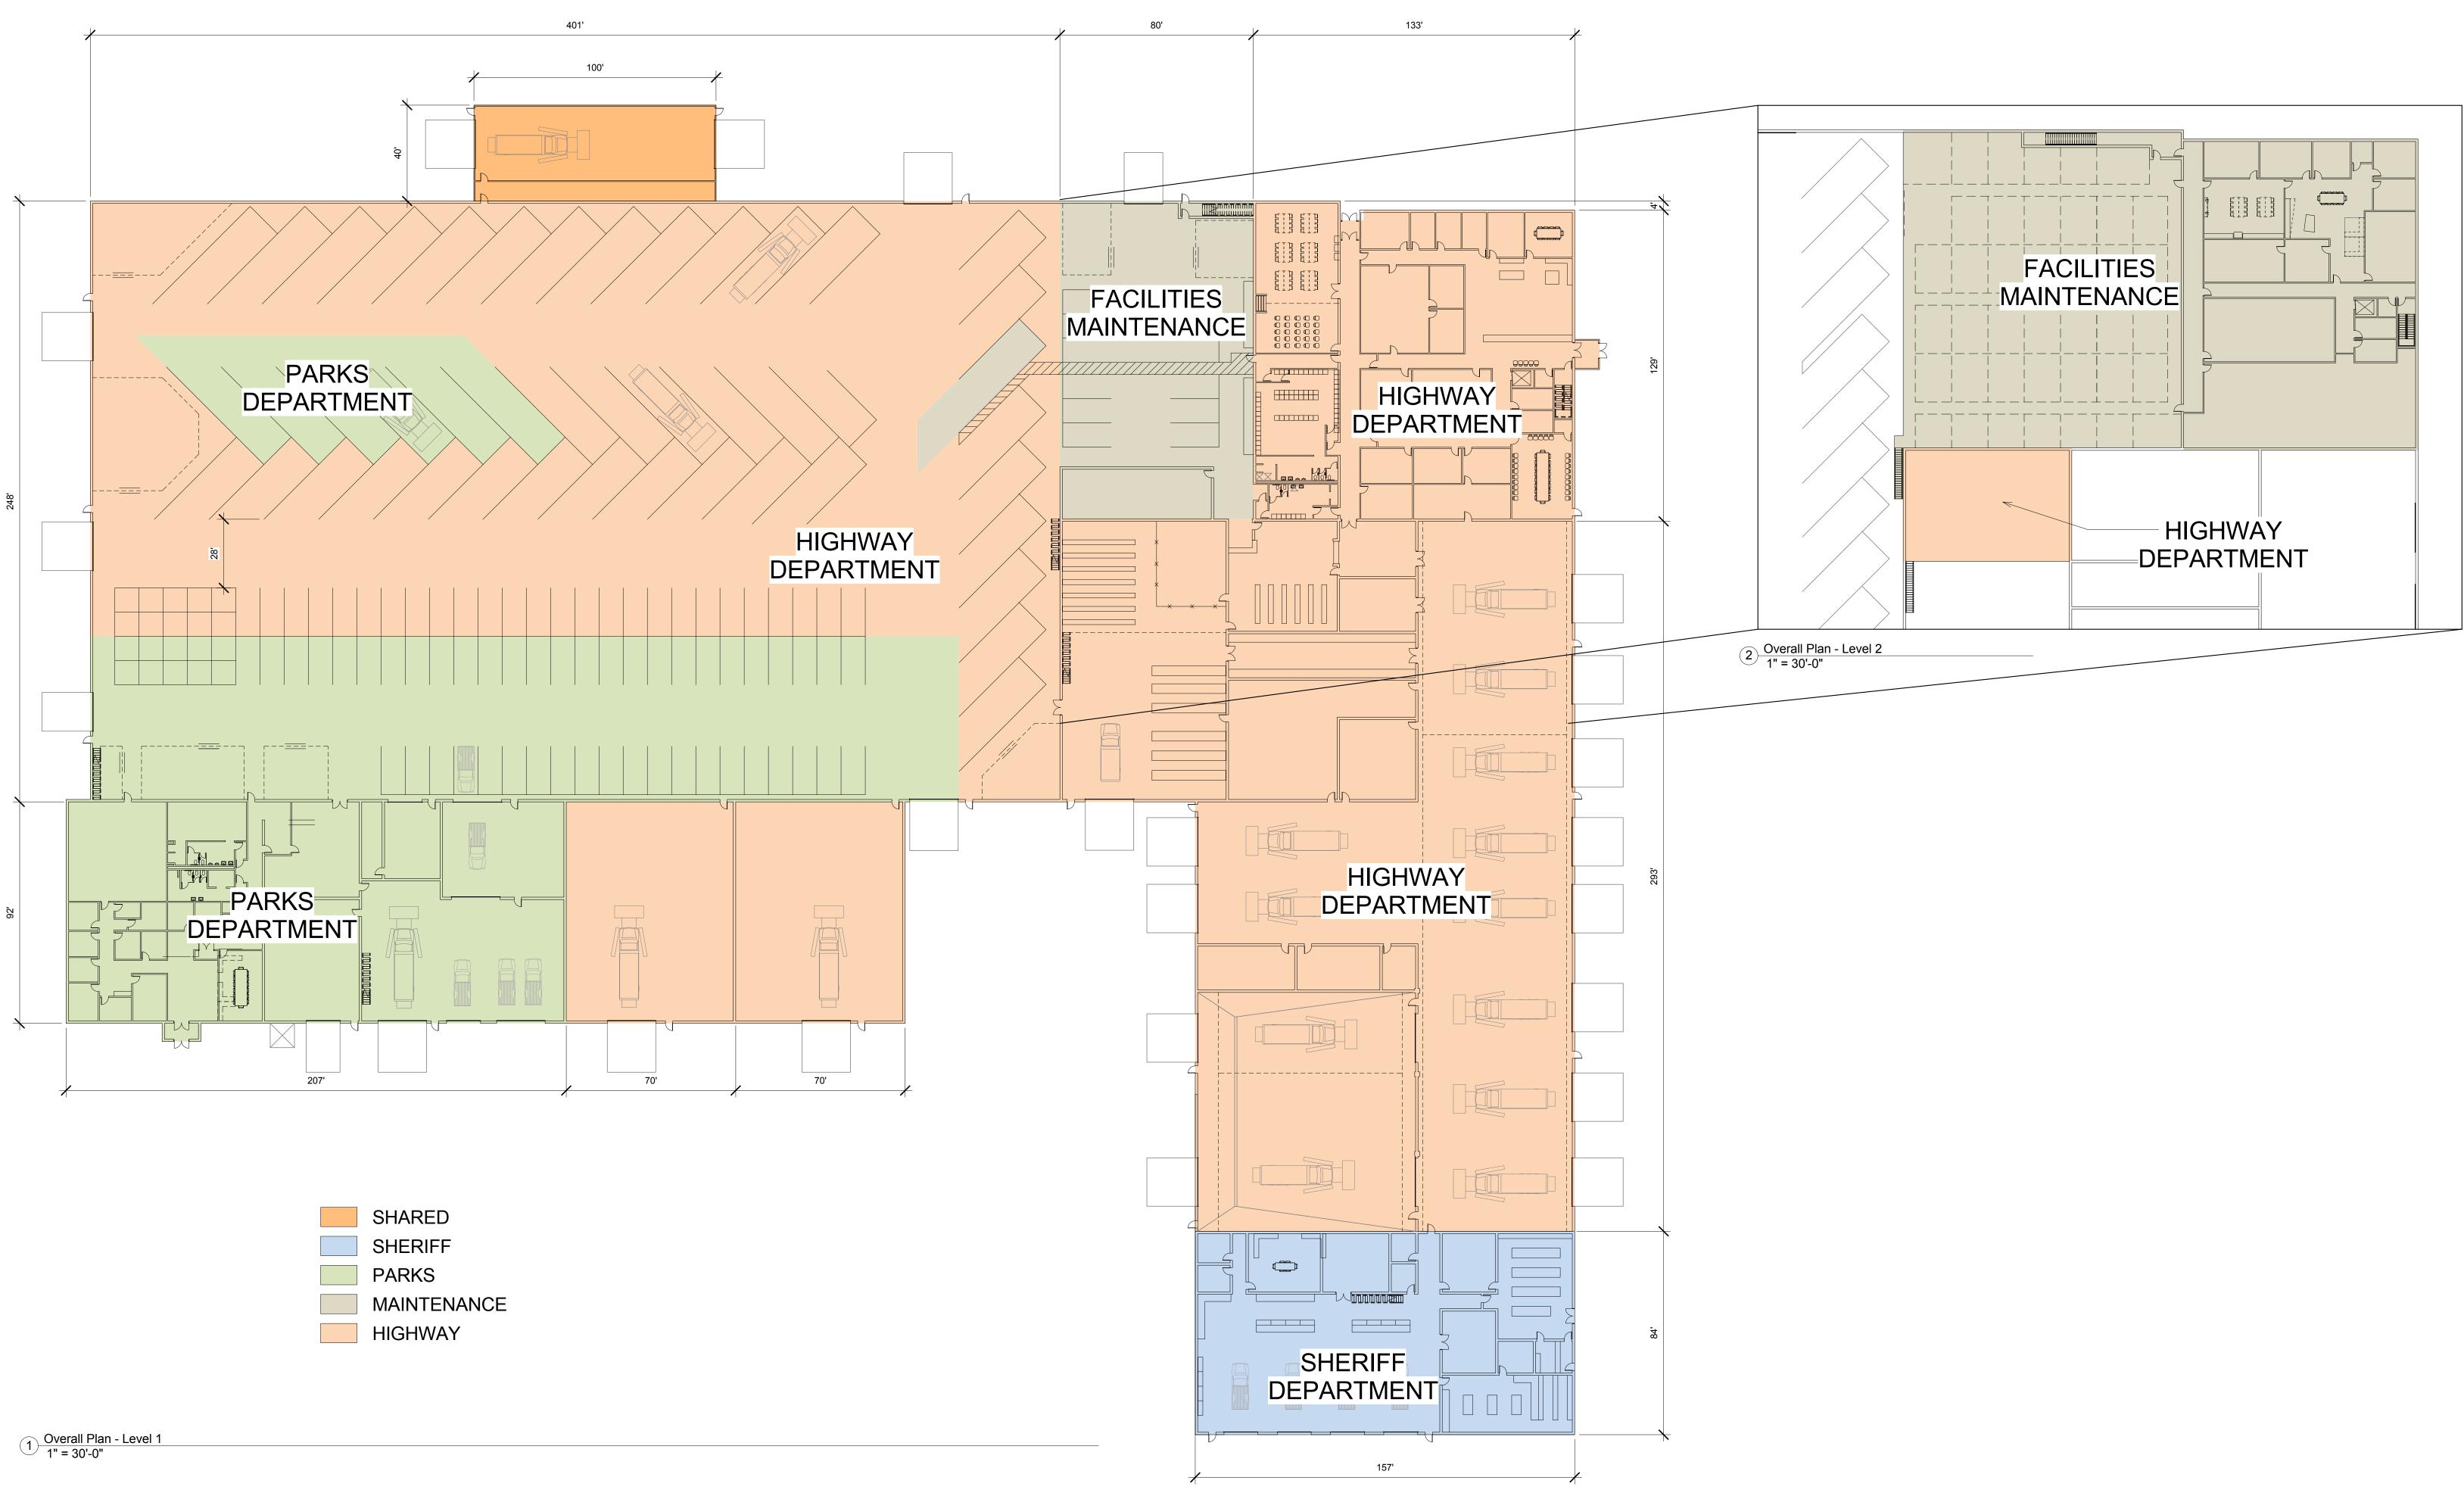

The main shop and administration building is approximately 215,000 ground square feet taking up nearly 5 acres of the site. Additional cold and tempered storage buildings for the Highway, Parks, and Sheriff are located adjacent to the their departments in the Main building.

Site material storage, fueling stations and perimeter fencing are all also accounted for and located on the site.
